

## CLAIM OR CLAIMS

What I claim my invention to be is:

- I. A female bushing apparatus with six different built in telescopic threads ranging in size from  $\frac{1}{2}$ " to 2". The telescopic threads in the bushing apparatus can be screwed into male pipe threads ranging in size from  $\frac{1}{2}$ " to 2".  
A female bushing apparatus that has three  $\frac{1}{4}$ " female taps or threads that are used for attachments that include 1 of 2 gauges for either ounces or pounds, a  $\frac{1}{4}$ " ball valve, and a  $\frac{1}{4}$ " valve stem air filler. The attachments are all interchangeable.
